**Letter of Recommendation**

**To Whom It May Concern,**

It is a pleasure to write a letter of recommendation for **Mr. Saif Ahmed**, who has been a part of the internship program(**Aug. 26, 2020 to Nov. 25, 2020**) organized by the company. He was recommended to us by **Dr. R Muralishankar, (IISC Ph.D.)** from **CMR University**(<https://muralishankar.blackweb.io/>).

During his tenure as an intern in the position of **Frontend Developer - Bootstrap**, he has performed beyond the expectations and requirements of the internship. In addition, he has outperformed a variety of tasks related to UI/UX design of the Landing page. He is also very professional and time conscious.

**Mr. Saif Ahmed** has worked with the team in assisting the design and development of the landing page. He comes up with new innovative ideas in the field of work. He has also provided innovative solutions to the tasks given to him.

I have personally supervised him and have found him exceptional with problem-solving skills and also he is a fast learner.

His short but significant service to **Coldchip Technology, Blackweb** signifies the capability of him to perform at the highest level. He is reliable and a great team member and has the competency to pursue masters at your esteemed institution.

Yours Sincerely,  
For Coldchip Technology Private Limited

Abishek D
